

# ANNUAL INDEX

- Amendola, Giovambattista, Mauro Fabrizio, and Murrough Golden. *Thermodynamics of a non-simple heat conductor with memory*, 787
- Anderson, Jeffrey R., Keng Deng, and Zhihua Dong. *Global solvability for the heat equation with boundary flux governed by nonlinear memory*, 759
- Barbarosie, Cristian. *Representation of divergence-free vector fields*, 309
- Bendali, A., A. Makhlouf, and S. Tordeux. *Field behavior near the edge of a microstrip antenna by the method of matched asymptotic expansions*, 691
- Berti, Alessia, and Maria Grazia Naso. *Unilateral dynamic contact of two viscoelastic beams*, 477
- Blokhin, A. M., and R. E. Semenko. *Electrodynamical instability of layered structures*, 651
- Bryan, Kurt, and Michael S. Vogelius. *Precise bounds for finite time blowup of solutions to very general one-space-dimensional nonlinear Neumann problems*, 57
- . *Transient behavior of solutions to a class of nonlinear boundary value problems*, 261
- Capobianco, M. R., and G. Criscuolo. *Numerical solution of a singular integral equation with Cauchy kernel in the plane contact problem*, 79
- Carillo, Sandra. *Existence, uniqueness and exponential decay: An evolution problem in heat conduction with memory*, 635
- Chan, C. Y., and P. Tragoonsirisak. *A multi-dimensional blow-up problem due to a concentrated nonlinear source in  $\mathbb{R}^N$* , 317
- Choudhury, Bejoy K. *Transient temperature response of spherical bodies*, 205
- Ciuperca, Ionel, and J. Ignacio Tello. *Lack of contact in a lubricated system*, 357
- Criscuolo, G. See Capobianco, M. R.
- Danilov, V. G., and D. Mitrovic. *Shock wave formation process for a multidimensional scalar conservation law*, 613
- Deng, Keng. See Anderson, Jeffrey R.
- Dong, Zhihua. See Anderson, Jeffrey R.
- Emmanouil, Panagiotis. *The direct scattering problem: Uniqueness and existence for anisotropic media*, 747
- Fabrizio, Mauro. See Amendola, Giovambattista
- Farina, A., A. Fasano, L. Fusi, and K. R. Rajagopal. *The one-dimensional flow of a fluid with limited strain-rate*, 549
- Fasano, A. See Farina, A.
- Fasano, A., A. Mancini, M. Primicerio, and B. Zaltzman. *Waiting time phenomena forced by critical boundary conditions in classical diffusion problems*, 105
- Fusi, L. See Farina, A.
- Gala, Sadek. *Remark on a regularity criterion in terms of pressure for the Navier-Stokes equations*, 147
- Golden, Murrough. See Amendola, Giovambattista
- Grenander, Ulf. See Portman, Nataliya
- Gui, Guilong, and Yue Liu. *On the Cauchy problem for the Degasperis-Procesi equation*, 445
- Ha, Seung-Yeal, Corrado Lattanzio, Bruno Rubino, and Marshall Slemrod. *Flocking and synchronization of particle models*, 91
- Han, S. Y., D. Hansen, and G. Kember. *Multiple scales analysis of water hammer attenuation*, 677
- Hansen, D. See Han, S. Y.
- Hoang, Tung, and Hyung Ju Hwang. *Dynamic pattern formation in Swift-Hohenberg equations*, 603
- Hu, Guili. See Qin, Yuming
- Hwang, Hyung Ju. See Hoang, Tung
- Irmischer, Tilman. *Global existence in nonlinear hyperbolic thermoelasticity with radial symmetry*, 39
- Kang, Jum-Ran. See Park, Jong-Yeoul
- Kember, G. See Han, S. Y.
- Kleinstein, Gerald G. *Impulsive displacement of a liquid in a pipe at high Reynolds numbers*, 157
- Lattanzio, Corrado. See Ha, Seung-Yeal
- Li, Y. Charles. *Stability criteria of 3D inviscid shears*, 379
- Liu, Yue. See Gui, Guilong
- de Loubens, R., and T. S. Ramakrishnan. *Asymptotic solution of a nonlinear advection-diffusion equation*, 389
- Makhlouf, A. See Bendali, A.
- Mancini, A. See Fasano, A.

## ANNUAL INDEX

- Markenscoff, Xanthippi, and Luqun Ni. *"Driving forces" and radiated fields for expanding/shrinking half-space and strip inclusions with general eigenstrain*, 529
- Massari, Umberto, Mariarosaria Padula, and Senjo Shimizu. *Loss of control of motions from initial data for pending capillary liquid*, 569
- Massarolo, C. P., G. P. Menzala, and A. F. Pazoto. *Uniform stabilization of a class of coupled systems of KdV equations with localized damping*, 723
- Menzala, G. P. See Massarolo, C. P.
- Miranker, Willard L. *Modeling consciousness as an adaptive phenomenon*, 291
- Mitrovic, D. See Danilov, V. G.
- Naso, Maria Grazia. See Berti, Alessia
- Ni, Luqun. See Markenscoff, Xanthippi
- Obnosov, Yu. V. *Three-phase eccentric annulus subjected to a potential field induced by arbitrary singularities*, 771
- Padula, Mariarosaria. See Massari, Umberto
- Park, Jong-Yeoul, and Jum-Ran Kang. *Global attractors for the suspension bridge equations with nonlinear damping*, 465
- Pazoto, A. F. See Massarolo, C. P.
- Portman, Nataliya, Ulf Grenander, and Edward R. Vrsay. *GRID macroscopic growth law and its application to image inference*, 227
- Primicerio, M. See Fasano, A.
- Qin, Yuming, Guili Hu, and Taige Wang. *Global smooth solutions for the compressible viscous and heat-conductive gas*, 509
- Rajagopal, K. R. See Farina, A.
- Ramakrishnan, T. S. See de Loubens, R.
- Rivera, Jaime E. Muñoz. See Sare, Hugo D. Fernández
- Rubino, Bruno. See Ha, Seung-Yeal
- Sare, Hugo D. Fernández, and Jaime E. Muñoz Rivera. *Analyticity of transmission problem to thermoelastic plates*, 1
- Scarpetta, Edoardo, and Mezhlum A. Sumbatyan. *Energetic properties of the elastic half-space loaded by a periodic distribution of vibrating punches: The study of the phase shift influence*, 15
- Semenko, R. E. See Blokhin, A. M.
- Shimizu, Senjo. See Massari, Umberto
- Slemróð, Marshall. See Ha, Seung-Yeal
- Stewart, David E. *Corrigendum for "Energy balance for viscoelastic bodies in frictionless contact"*, 203
- Sumbatyan, Mezhlum A. See Scarpetta, Edoardo
- Sun, Meina. *Delta shock waves for the chromatography equations as self-similar viscosity limits*, 425
- Tello, J. Ignacio. See Ciuperca, Ionel
- Tordeux, S. See Bendali, A.
- Tragoonsirisak, P. See Chan, C. Y.
- Tsai, Je-Chiang. *Existence of traveling waves in a simple isothermal chemical system with the same order for autocatalysis and decay*, 123
- Vajravelu, K. See Van Gorder, Robert A.
- Van Gorder, Robert A., and K. Vajravelu. *Multiple solutions for hydromagnetic flow of a second grade fluid over a stretching or shrinking sheet*, 405
- Vogelius, Michael S. See Bryan, Kurt
- Vrsay, Edward R. See Portman, Nataliya
- Wang, Taige. See Qin, Yuming
- Zaltzman, B. See Fasano, A.
- Zhao, Kun. *Global regularity for a coupled Cahn-Hilliard-Boussinesq system on bounded domains*, 331
- Zumbrun, Kevin. *Instantaneous shock location and one-dimensional nonlinear stability of viscous shock waves*, 177
